

This book is a text for teaching students about managed mental health care. It provides an overview of how managed mental health-care systems work, how managed care is reshaping the private mental health/substance abuse treatment delivery system, its implications for clinicians everywhere, and how clinicians may work with, not against, managed care to provide advocacy for their clients and prosperity for their practices. The Clinicians Guide to Managed Mental Health Care teaches prospective clinicians how to: select quality managed care programmes or employee assistance programmes (EAPs); manage the utilization management process and procedures; market services to managed care groups; develop new services amenable to managed care systems; learn new EAP models that incorporate managed care features; redesign hospital-based treatment programmes to attract managed care referrals; and advocate for clients within the constraints of managed care systems. Helpful resource directories and other information of practical use to students and clinicians are also included.

The Big Book of Hormones: Survival Secrets to Naturally Eliminate Hot Flashes, Regulate Your Moods, Improve Your Memory, Lose Weight, Sleep Better, and More!, De costumbres y leyes (Estudios Historicos) (Spanish Edition), The Story of Ferdinand, The Wisdom of Science: Science in Sound Bites, Physics of the Galaxy and Interstellar Matter (Astronomy and Astrophysics Library), Das Alte Testament (German Edition), A Peoples History of Baseball, cauchy3-book-35-poems: Hocus-pocus are rights, Finite Mathematics (10th Edition),
